wonders of their bodies in a direct, easy-to-read manner. The story begins with Nicholas, 7, and Jenny, 5, learning about different types of science in their class - from ecology to the digestive system. Then Meg Hickling, a guest speaker, comes to talk to them about a new type of science. Harbour Publishing: Boys, Girls & Body Science Boys and girls learn differently for a very simple biological reason - their brains are built differently. Given, their differences, boys and girls perform better provided different stimuli. Our current education system denies this fact and therefore denies the everyday results of these biological differences. Here's a brief list of these biological differences and some of the physiological ramifications: Brain Science

shape and composition of the body, and a rapid development of the reproductive organs and other characteristics marking sexual maturity. Puberty | physiology | Britannica Graphs of the amounts of subcutaneous fat on males and females from birth to 16 years revealed that from eight years on, the curves for girls and boys diverge more radically, as do the curves for limb and body fat. At adolescence the limb fat in boys decreases, while the body fat shows a temporary slowing down of gain but no actual loss. In girls there is a slight halting of the limb-fat gain at adolescence, but no loss; the trunk fat shows only a steady rise until adolescence. Development ...
