Sustainable Building Skin Design 3

Introduction A building's skin is the first layer that confronts us when we evaluate a design aesthetically and also a crucial element in the overall technological functionality of a building. When we identify the defining characteristics of a building we are commonly describing its skin. Sustainable Building Skin Design The outsourcing of design and drawing labor overseas; the robotic manufacturing of building components and materials; and the use of sophisticated three-dimensional computer programs to design buildings raise questions and challenge current modes of project delivery. ...
