DVTI simplifies Virtual Private Network (VRF) routing and forwarding- (VRF-) aware IPsec deployment. IPsec Virtual Tunnel Interface [Support] - Cisco Systems Select VPN as this will be an IPsec VPN: VPN Type: Select Route-based because this is a VTI. Policy-based is used when doing a crypto map VPN: SKU: Need to select VpnGw1 or greater based on the amount of traffic needed. Basic doesn't support BGP: Enabled active/active mode: Do not enable. Configure ASA IPsec VTI Connection to Azure - Cisco Static VTI (VTI) With DVTI, we use a single virtual template on our hub router. Whenever a new IPsec session is needed, the router automatically creates a virtual access interface that is cloned from the virtual

template. The virtual template can include pretty much everything you would use on a regular interface. IPsec VTI Virtual Tunnel Interface -

NetworkLessons.com Dynamic Multipoint VPN (DMVPN) Dynamic Multipoint VPN (DMVPN) is a Cisco IOS Software solution for building scalable IPsec Virtual Private Networks (VPNs). IPsec VPN: EzVPN, GRE, DMVPN, VTI, GETVPN - CiscoZine The ASA supports a logical interface called Virtual Tunnel Interface (VTI). As an alternative to policy based VPN, a VPN tunnel can be created between peers with Virtual Tunnel Interfaces configured. This supports route based VPN with IPsec profiles attached to the end of each tunnel. This allows dynamic or static routes

to be used. CLI Book 3: Cisco ASA Series VPN CLI Configuration Guide ... Cisco ® IPsec VTIs are a new tool that customers can use to configure IPsec-based VPNs between site-to-site devices. IPsec VTI tunnels provide a designated pathway across a shared WAN and encapsulate traffic with new packet headers, which helps to ensure delivery to specific destinations. IPsec Negotiation/IKE Protocols - Cisco The ASA supports a logical interface called Virtual Tunnel Interface (VTI). As an alternative to policy based VPN, a VPN tunnel can be created between peers with Virtual Tunnel Interfaces configured. This supports route based VPN with IPsec profiles attached to the end of each tunnel. ASDM Book 3: Cisco ASA

interesting traffic: Lab 13-2: Basic Site-to-Site IPsec VPN and NAT > IPsec VPN ... One more VPN article. Even one more between a Palo Alto firewall and a Cisco router. But this time I am using a virtual tunnel interface (VTI) on the Cisco router which makes the whole VPN set a "route-based VPN". That is: Both devices decide their traffic flow merely based on the routing table and not on access-list entries. IPsec Site-to-Site VPN Palo Alto Cisco Router w/ VTI ... The missing command from each of those VTI configs was: tunnel mode ipsec ipv4. Therefore: nterface Tunnel2.
ip address 172.16.1.1

ipv4. That seems to have fixed it. Solved: IPsec Tunnel Mode VTI and NAT - Cisco Community The ASA VPN module is enhanced with a new logical interface called Virtual Tunnel Interface (VTI), used to represent a VPN tunnel to a peer. This supports route based VPN with IPsec profiles attached to each end of the tunnel. Using VTI does away with the need to configure static crypto map access lists and map them to interfaces. Route-based VPN (VTI) for ASA finally here! - Cisco Community ASA Route-Based VPN (VTI) with Fortigate Firewall. By Manny Fernandez. Published on November 7, 2019. Customer had a question about creating a route-based VPN between a Cisco ASA and a Fortigate. Traditionally, the ASA has been a policy-based VPN
