polynomial. The main problem of the theory of equations was to know when an algebraic equation has an algebraic solution. Theory of equations - Wikipedia Theory of Equations. Every Equation of  $n$ th degree has a total ' $n$ ' real or imaginary roots. If  $\alpha$  is the root of Equation  $f(x) = 0$ , then the polynomial  $f(x)$  is exactly divisible by  $(x - \alpha)$  i.e.  $(x - \alpha)$  is the factor of the given polynomial  $f(x)$ . The history of group theory, a mathematical domain studying groups in their various forms, has evolved in various parallel threads. There are three historical roots of group theory: the theory of algebraic equations, number theory and geometry. Joseph Louis Lagrange, Niels Henrik Abel and Évariste Galois were

early researchers in the field of group theory.
