Foundations Of Algorithms
Neapolitan Algorithms (4th Edition)
by Sedgewick My favorite is
Neapolitan's, because 1. It covers
both design paradigms and
complexity analysis. Kleinberg's
focus on design paradigm, and
Sedgewick's focus on complexity
analysis of already existing
algorithms. Neapolitan is
somewhere between those two. 2. I
like the author's presentation
style. Foundations of Algorithms:
Neapolitan, Richard ... Foundations
of Algorithms, Fourth Edition offers
a well-balanced presentation of
algorithm design, complexity
analysis of algorithms, and
computational complexity. The
volume is accessible to mainstream
