Gas Properties - Gas, Pressure, Volume - PhET TSW define four important properties of gases- pressure, temperature, volume, and amount of a substance. TSW graphically analyze the relationships between the properties and define their proportional relationship. TSW apply gas properties and laws to real life. Gases: Properties and Laws published by the PhET This simulation provides a highly visual, interactive

way for students to explore gas properties. As they pump gas molecules into a chamber, they control volume, add/remove heat, and change gravity. A pop-up histogram helps them see the relationship between kinetic energy and heat. PhET Simulation: Gas Properties
