Handbook Of Solitons Research Technology Summary:
In mathematics and physics, a soliton is a self-reinforcing solitary wave (a wave packet or pulse) that maintains its shape while it travels at constant speed. Solitons are caused by a cancellation of non-linear and dispersive effects in the medium. This book presents the research in the field. Handbook of solitons : research, technology and ... Soliton oscillators can be very simple, and output nearly transform-limited pulses. However, pulse durations are limited by the resonant instability $L_{cav} \leq (\pi/2)L_D$, empirically observable as the growth of narrow spectral
