7.1. Introduction and Purpose Humans live in a wide variety of settlements, ranging from hunter-gatherer camps and villages of a handful of families to modern megacities and metropolitan regions of tens of millions of inhabitants. Human Settlements, Energy, and Industry Human settlements, defined in ECE Energy Statistics as “households and other consumers” (including commerce and tertiary activities) absorbed in 1974 36 per cent of the total final energy consumption in the ECE region (see Table 1). The tonnage involved in direct use was about 1,425 million tce (tons of coal equivalent), but in order to make the deliveries of secondary forms of energy possible, another 700 to 800 million tce had to be committed by the energy conversion industries.
