Programming Microsoft Access with VBA can be a lot easier if you know the keyboard shortcuts for the most common commands and tasks and the most common bits of code that you'll use in the editor and immediate windows as you build and debug your Access application. Access VBA Programming For Dummies - dummies For example, you might want to automatically maximize the application window, lock the Navigation Pane, and then open a particular report. An AutoExec macro is just a macro that is named AutoExec. When a database

starts, Access runs the AutoExec macro before it runs any other macros or VBA code. Create an AutoExec macro Create a macro that runs when you open a database - Access What is a macro? A macro in Access is a tool that allows you to automate tasks and add functionality to your forms, reports, and controls. For example, if you add a command button to a form, you associate the button's OnClick event to a macro, and the macro contains the commands that you want the button to perform each time it is clicked. In Access, it is helpful to think of macros as a simplified programming language that you write by building a list of actions to perform. Introduction to macros - Access - support.microsoft.com Another method to enable

macros in a file is via the Microsoft Office Backstage view, the view that appears after you click the File tab, when the yellow Message Bar appears. Click the File tab. In the Security Warning area, click Enable Content. Under Enable All Content, click Always enable this document's active content.
