Nikon | Download center | SB-400 Nikon's manual's death-mongering warnings, simply copied from a camera manual, forget to warn against powering the flash from external sources, heh heh. If you don't mind destroying your SB-400 in the name of science, I'd wonder if it recycles any faster from the higher voltage of three or four series-connected external cells. Nikon SB-400 DSLR Cameras can also be used with optional flash

Flash Level (Guide Number) - Nikon | Imaging Products The Guide Number (GN) is as much about the reflector coverage angle as about the power level.. If the GN of one flash is specified as GN 180, but its narrow zoom coverage angle is concentrating all the power to only illuminate a small bright spot on the wall, and another flash specifies GN 90, but its wide reflector is illuminating the entire room, then we don't know much about the difference. Compare Power Rating of Camera Flashes with Guide Numbers The SB-600 works with
