Use b to stand for "The two angles are supplementary." Example: If the two angles are a linear pair, then the two angles are supplementary. a b 1. If the two angles are supplementary, then the two angles are a linear pair. b a 2. If the two angles are not supplementary, then the two angles are a linear pair. ~b a 3. Practice B Indirect Proof and Inequalities in One Triangle Possible answer: The Substitution Property states that if a b, then b can be substituted for a in any expression. Applying the Symmetric Property to the Substitution Property shows that if b a, then a can be substituted for b in any expression. So if a b and b c, then a c by the Substitution Property, and this is also the Transitive Property. Practice B Algebraic Proof To write a geometric proof, start with the hypothesis of a conditional.
