The waste lubricant, through the contamination undergone during use, has become unsuitable for lubrication due to the presence of impurities and other products (e.g. other lubricants of mineral and/or synthetic base, water, fuel, asphalt products, etc.) or due to the loss of its original properties. How are lubricants produced –

Cyclon Different recycling techniques have been proposed for refining of used lubricating oils. During refining, the chemical,

physical and mechanical impurities are removed with the following processes: distillation, acidic refining, clay treatment and hydrogenation. These processes give different yield and product. Recycling of used engine oil by different solvent ... The methods used in the re-refining of the used lubricating oils include methods such as, filtration to remove impurities, acid treatment, acid/clay treatment, and distillation/clay treatment and activated charcoal/clay treatment. Collection of test samples A comparative study of recycling of used lubrication Oils ... The used oil is first tested to determine suitability for re-refining, after which it is dehydrated and the water distillate is treated before

being released into the environment. Dehydrating also removes the residual light fuel that can be used to power the refinery, and additionally captures ethylene glycol for re-use in recycled antifreeze.

Automotive oil recycling - Wikipedia PROCESS INVOLVED IN USED OIL RE-REFINING Step 1 -

Dehydration The oil is boiled in a closed container to remove the water that has been mixed into it.

Step 2 - Diesel stripping The dehydrated oil is then fed continuously into a vacuum distillation plant for fractionation. re-refining of used lube oil -

SlideShare This technique is widely used for the process of highly effective recycling and refining of various used lubricating oil in various small scale plants with

small recycling and refining capacities. The distilled product, which is precisely obtained from this batch distillation process, can be refined into different viscosities of base oil.
