Amazon.com: Customer reviews: SNMP MIB Handbook A MIB (Management Information Base) is a file containing syntax defining data objects to be managed and traps to be sent. MIB objects and their values are the focus of the protocol. Simplicity of SNMP is the reason for its initial and continued success -- simple MIB objects define information sent using a simple message set. SNMP Mib Handbook

Documentation Library The Eaton Industrial Gateway Card (INDGW-M2) combines the features of an SNMP agent, HTTP/web server and a Modbus card to facilitate remote monitoring of your UPS system through any Building Management System. Enjoy the freedom to customize and schedule actions, like shutdown protocols and load shedding, and receive immediate notifications during power events, without having to be onsite. UPS Network Management Card | Industrial Gateway Card | Eaton The first complete, practical insider's guide to writing SNMP MIBs. With this book, network professionals can learn how to design, define, write and update useful SNMP Management Information Bases (MIBs) that support standards-

based network management. It's easy to search Wikibooks by topic, and there are separate sections for recipes and childrens' texbooks. You can download any page as a PDF using a link provided in the left-hand menu, but unfortunately there's no support for other formats. There's also Collection Creator - a handy tool that lets you collate several pages, organize them, and export them together (again, in PDF format). It's a nice feature that enables you to customize your reading material, but it's a bit of a hassle, and is really designed for readers who want printouts. The easiest way to read Wikibooks is simply to open them in your web browser.
